Partly cloudy (night)	Light rain showers	Heavy rain showers	Heavy rain showers	Sunny intervals	Clear night
Precipitation probability					
20%	40%	40%	30%	20%	<05%

Forecast for Wednesday 08 Jun 2022

Weather: Outbreaks of light and patchy rain during the early hours will fade away after dawn. Cloud will lift and break to allow some bright or sunny spells, but the sunshine will trigger scattered heavy showers, these seeing a risk of thunder with hail possible. The risk of thunderstorms passes mid-afternoon onwards, as showers steadily easing to leave a dry evening with clear spells. A fresh westerly wind persisting throughout.

Chance of cloud-free hill tops above 600m: 40% at first otherwise 90%.

Low cloud and visibility: Periods of cloud down to 300-400m in the early hours and at first Wednesday morning, particularly affecting western slopes. Otherwise cloud will be generally clear of the summits, but lowering close to the highest tops in showers. Visibility generally good beneath cloud, but moderate to briefly poor in any heavy showers.

Meteorologist's View

UV levels will be high in any sunny spells and adequate sun protection is highly advised. Be aware of the risk of thunderstorms, especially during the middle of the day.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Wed 08 Jun 2022	2.2mm	4mm	12.6mm

Forecast for Thursday 09 Jun 2022

Weather: Clear spells during the early hours and some early sunshine on Thursday morning before skies cloud over. Outbreaks of rain and drizzle will spread from the southwest during the morning, and will continue during the afternoon and evening.

Maximum wind: Southwest 25mph gust 35mph.

Chance of cloud-free hill tops 600m: 90% deteriorating to 20% or less by midday.

Low cloud and visibility: Patchy cloud near 700m at first will thicken and lower as rain and drizzle arrive, bringing extensive cloud on slopes above 400-500m. Visibility beneath cloud initially good, but becoming moderate occasionally poor in outbreaks of rain and drizzle.

Temperature: **Valleys:** Plus 10 Celsius becoming plus 16 Celsius.
At 600m: Plus 9 Celsius.
Freezing level: Above the summits
